

## RED CROSS RALLY TO WAKE UP CITY

Chairman Macfarland Sure  
Results Will Follow.

NO DIRECT APPEAL FOR MONEY

Committee Will Do Missionary  
Work at Shadake Dinner.

Chairman Henry B. F. Macfarland of the District Red Cross Finance Committee, said this morning that material results are expected from the Masonic and Eastern Star Red Cross rally to be held at Pol's Theater, Sunday afternoon, notwithstanding the fact that no collection will be taken there or admission charged. These results, Mr. Macfarland explained, will inevitably follow the "waking up" of the people by the presence of the speakers.

Wallace Streeter, treasurer of the Masonic and Eastern Star Red Cross Auxiliary, informed Mr. Macfarland today that he could expect a second large subscription from his Monday.

Vice President Marshall and Miss Mabel Boardman have consented to make addresses at the rally Sunday.

Both British and French Red Cross representatives are expected to be present.

At the special invitation of the Board of Trade, members of the finance committee will attend the shadake of that body tomorrow and explain in detail what is to be done to secure Washington's share of what is expected from the country by President Wilson.

Gifts Are Acknowledged.

The following contributions are acknowledged today at the local Red Cross headquarters:

Mrs. Samuel Spencer, \$200; Catherine L. Sheehan, \$12; H. H. Pierce, \$5; Ruth Behrend, \$5; Gertrude Louis, \$5; W. M. Daniels, \$10; Miss F. L. Hanson, \$1 a month; Employees of S. Kahn Sons & Co., \$50.40; Employees Commercial National Insurance Co., \$7; P. B. Jones of Costa Rica, \$20; Heloise Brainerd, \$5.

More, \$15.

## SHACKLETON DESCRIBES VOYAGE IN ANTARCTIC

Famous Explorer Tells of Thrilling  
Struggles in Frozen Seas.

A life and death battle for months in the frozen antarctic was vividly described in words and pictures at Memorial Continental Hall, yesterday afternoon and last night, when Sir Ernest Shackleton, the distinguished British explorer, thrilled 3,000 members of the National Geographic Society.

While the entire lecture held the audience spellbound, particular interest centered in the story of the 800-mile voyage through the winter sea in a 22-foot boat in search of aid for the twenty-two men marooned on Elephant Island.

The explorer, a quiet, modest, unassuming man, gave a graphic description of the hair-breadth escapes he and his party had during the expedition of 1914-17. His lecture was liberally punctuated with dry but grim humor.

The crushing of the great ship Endurance in the ice, with its last fragment sinking in 1,900 fathoms of water hundreds of miles from land, the voyage of the party on an island of ice, and the frequent attempts of members of the party to escape death in marrow chilling water, were all told with compelling realism.

"GOING UP" SAY GIRLS;  
RUN ELEVATORS NOW

Feminine Lift Conductors See No  
Reason Why They Shouldn't.

"Elevator operating is fine and

easy."

Miss Jennie Trumbull and Miss Nola Yoder, girl elevator operators in Rust Hall in North Capitol street, today gave this verdict in reply to questions as to how they liked their unique work.

"I don't see why we girls can't run elevators just as competently as the men do," one of the young women continued.

"Not one reason in this wide

world why we can't," the other girl added.

So the question was settled and the doors of opportunity in a "new" occupation slid open to woman if she but chooses to enter it.

Who cares?

Not the elevator boy, for he is going to war; not women, because girls' careers—least of all in elevators—and not men—never!

NINE TO GET DOCTOR'S  
DEGREE FROM G. W. U.

Members of Graduate School Successfully Defend Their Theses.

Nine members of the school of graduate studies of George Washington University have successfully defended their theses, and will have the doctor's degree conferred upon them at the spring commencement exercises, to be held in the assembly hall of the new Central High School, Thirtieth and Clifton streets northwest, on Wednesday evening, June 6.

The successful candidates and the subjects of their theses follow: Alfred Blumberg, M. Ph., '08, Royal Francis Joseph University, Hungary; Ph.D., '16, George Washington University, "Studies in Immunity With Special Reference to Complement Fixation."

Louis George Connor, B. S., '10, S. M., '13, Wesleyan University, M. S. A., '12, Cornell University, "A Brief History of the Sheep Industry in the United States."

Leonard Lee Harter, A. B., '03, A. M., '06, University of Nebraska, "The Food Blight Disease of the Lima Bean (Phaseolus Luminatus) Caused By Diaporthe Phaseolorum C. & E."

William Dwight Pierce, A. B., '04, A. M., '07, University of Nebraska, "The Comparative Morphology of the Insect Order Strepsiptera."

Mary Jane Rathbun, A. M., '16, University of Pittsburgh, "The Grapoid Crabs of America."

Charles Elmer Reaser, A. B., '13, Franklin and Marshall College, A. M., '15, George Washington University, "The Stratigraphic and Geographic Distribution of North American Cambrian Fossils."

Ruric Cregan Roark, A. B., '08, University of Cincinnati, A. M., '08, University of Illinois, "A Chemical Study of Pyrethrum."

John William Roberts, A. B., '04, A. M., '09, University of Nebraska, "The Source of Apple Bitter-rot Infection."

Arthur William Sampson, B. S., '07, A. M., '09, University of Nebraska, "Climatic Conditions As Related To Plant Growth and Other Physiological Activities."

Charles Elmer Reaser, A. B., '13, Franklin and Marshall College, A. M., '15, George Washington University, "The Stratigraphic and Geographic Distribution of North American Cambrian Fossils."
